Paul- Many of the letters to and from the Congress in this DJ/Crimi nal list pertain to the post HSCA testing, and a large percentage of the other records are from and about Braden/Brading. The Dworestky letter is from a British professor who agreed with the Barger analysis but found a flaw in it, a logical flaw - the presumption that there was only one rifle in the HSCA. He did an interesting thing-analyzed the testimony of eyewitnesses. He concluded that they support the Barger analysis.
